David Gildea B.Sc. Pharm. MPSI FAOI operates the opticians practice - based in 3 Fagan's Lane, Maynooth, Co. Kildare and over Gildea's Pharmacy, Main St., Kinnegad.
For all appointments in the Kinnegad practice, please phone the Maynooth office (01) 629 0370.

Both practices are equipped to carry out standard sight testing, including Glaucoma screening and Colour vision testing along with Contact Lens fitting.

All types of contact lenses are supplied - from specialist gas permeable lenses for keratoconus to the latest daily disposable and oxygen permeable reusable lenses. Free trials are available in most lens types.

Many innovations have been introduced in recent years to aid the early detection of ocular conditions and also to help detect general diseases such as diabetes and heart disease. Instruments such as the automated perimeter and the digital retinal camera in our Maynooth practice can be used if patrons require referral.

An extensive selection of frames is carried from our 'own-brand' economy range to modern designer brands such as Gucci, Tommy Hilfiger, FCUK, DKNY etc. Prescription sunglasses are also available in these ranges as well as specialist brands such as RayBans and Serengeti.

Our glazing laboratory in Maynooth ensures a fast turn-around on spectacle orders - but we ensure that quality is never compromised. All types of spectacle lenses are dispensed. Whatever your requirements - from Anti-reflective coatings to High Index (Thin) materials or complete Varifocals, we can cater for all - and at a competitive price. We also supply prescription swimming and sport goggles along with safety spectacles.

Medical card holders and people paying social insurance (along with their spouses) are entitled to a free sight test and spectacle allowance every two years. Prior authorisation is required but in most cases this takes no more than a couple of weeks. For enquiries and application forms simply call in or phone.
